

“Quadrant experience helps Home Office achieve its goals for a better environment for staff and inmates”

HM Prison Service

Client: Home Office

Client Since: 1979

Scope: Specialist consulting, systems design and integration to create technology solutions for the Prisons estate

Client goals

- To create a safe and secure environment for staff and inmates.
- To meet Home Office guidelines for security measures dependent upon category of establishment.

Project Partners

- Client Consultants
- Prime construction contractors
- Client QS

Key notes

Quadrant has developed a deep understanding of the technology requirements of the Home Office as applied to the Prisons Estate.

To the benefit of the client, Quadrant's experience enables it to select suitable products and to produce system designs that conform to stringent standards laid down by the Home Office.

The application of an integrated approach to perimeter sensors, CCTV systems and control rooms provides the client with compliant solutions that ease operator use.

Key to the work is a correct detailed design (based on many years of practical experience) followed by the selection of specialist subsystems and products.

Early identification of critical issues enables Quadrant not only to meet the client's operational targets, but also to provide systems that are highly reliable and resilient after long periods of time.

“System guarantees were achieved with pre-build and the quality of installation work.”

Scope of supplied services Scope of supplied technology

- | | |
|--------------------------------|---|
| ■ Consultancy | ■ Access control |
| ■ Feasibility study | ■ ANPR |
| ■ Project design | ■ CCTV cameras |
| ■ Project management | ■ Communications – copper/fibre/IP/wireless |
| ■ Procurement management | ■ Control room systems and furniture |
| ■ Technology integration | ■ Digital recording |
| ■ Software development | ■ Digital storage |
| ■ Installation and supervision | ■ Intercom and PA |
| ■ Commissioning | ■ Intruder alarms and monitoring |
| ■ Service and maintenance | ■ Perimeter intrusion detection |
| ■ Training | ■ Personal attack |
