

“Creating a more seamless operating team...”

Local and Police Authorities

Client: Local and Police Authorities across the UK

Client since: 2003

Scope: ANPR technology for Police and Local Authority use

Client goals

- Reduction in criminal activity
- Improved efficiency in the use of limited resources
- Develop close partnering between Local and Police Authorities

Key notes

The use of ANPR technology in the fight against crime has seen Local and Police Authorities developing ever-closer ties as they share and invest in common technology infrastructure. Quadrant’s CCTV integration expertise in public space applications has been employed throughout the UK to deploy the latest covert and overt systems as permanent, portable or vehicle-mounted solutions. Closer partnerships have afforded greater returns on investment with benefits from extended infrastructure and greater efficiency.

Quadrant identifies key operational and technology considerations for successful implementation:

Use of current control room resources

Full training and procedural support is required to achieve full benefits from the system, across operation, response handling and problem resolution.

Integration to current infrastructure

Systems must operate seamlessly with Local Authority infrastructure while complying with the latest Police developments, in particular BOF2 (Back Office Facility 2) and NAAS (National ACPO ANPR Standards).

Efficient ongoing service and support

A single provider for the maintenance of expanded infrastructure is essential to achieve the best support and fastest resolution times.

Flexibility for future additions

The consideration for future expansion requirements should be planned for and reviewed on a regular basis to allow for smooth and rapid system deployment.

“ A closer working partnership has allowed for a greater return on the capital employed to set up these schemes.

Scope of supplied services:

- Consultancy
- Feasibility study
- Project design
- Project management
- Procurement management
- Technology integration
- Software development
- Installation and supervision
- Commissioning
- Service and maintenance
- Training

Scope of supplied technology:

- Access control
- ANPR
- CCTV cameras
- Communications – copper/fibre/IP/wireless
- Control room systems and furniture
- Digital recording
- Digital storage
- Intercom and PA
- Intruder alarms and monitoring
- Perimeter intrusion detection
- Personal attack

Related technologies and services:

- Barriers/Blockers/Turnstiles
- Security lighting
- Fencing
- Civil Works
- Audio capture and recording

Ongoing Benefits

Our Police clients have realised benefits in operational efficiency and capture rates. The additional benefits in terms of greater working involvement with Local Authorities has enabled Police and Operators to create a more seamless operating team.
